

Desktop Web (Chrome WebGPU) Mobile Web (Chrome Android WebGPU) Native Android (CV, real /proc) 1 core fully saturated (100%)

Memory usage over time — CV pipeline, harmonised plotting units
Web: JS heap + WASM heap (both workers) Native: RSS from /proc/self/status

Process CPU utilisation over time — CV pipeline, harmonised plotting units
Web: main-thread saturation × 100 (capped at ~100% — single-thread WASM) Native: top-style process CPU% (out of cores × 100)

Peak / mean (179 sheets, 100 ms sampling)					
Desktop Web (Chrome WebGPU)	mem peak	1024	mean	519	CPU peak 118% mean 43%
Mobile Web (Chrome Android WebGPU)	mem peak	156	mean	40	CPU peak 183% mean 70%
Native Android (CV, real /proc)	mem peak	485	mean	404	CPU peak 539% mean 348%
